

# **Project Proposal Document**

## **Technical Requirements**

This section outlines the technical requirements necessary for the successful implementation of the project. The system must support scalability, high availability, and integration with existing infrastructure. Minimum hardware and software specifications must be adhered to, including secure communication protocols, cloud deployment readiness, and compliance with relevant standards.

## **Budget**

The budget allocated for this project is estimated at INR 25,00,000. This includes software licenses, infrastructure costs, human resource expenditure, and contingency funds. A detailed financial proposal is attached in the appendix for review and approval.

## **Qualification**

Eligible vendors must have a minimum of 5 years of experience in handling similar projects. The qualification criteria include demonstrated experience in large-scale software deployment, certified personnel, and a proven track record in timely delivery. Documentation proving eligibility must be submitted along with the proposal.
